

Introduction to Science Journalism

In this lecture, we will invite Mr. Takeshi Shimizu as lecturer.

Science journalism has the role to connect the society and increasingly complex science and technology, and its importance has been growing in Japan particularly after the Fukushima nuclear power plant accident. From his experience of studying physics and mathematics at the University of London and working for news at the BBC, Mr. Shimizu will lecture on the necessary professional and linguistic skills, and possible career path to become a science journalist.
